

Program: Data Donation Symposium

Day 1 – Thursday, 30 May 2024

Time	Activity	Presenter
12:00-12:45	<i>Walk-in and registrations</i>	
12:45	Opening	
12:55	Keynote Data4Science: Agency, Transparency and Reciprocity in Data Donation Individuals are increasingly aware of the large amounts of personal data collected from them by when they use services and want more agency in the use and understanding of their own personal data. At the same time, this valuable personal data that could generate fundamental discoveries to benefit the public good is often inaccessible for scientific researchers. They lack agency, transparency and reciprocity. Leveraging recent GDPR regulations of the right to data portability, Data4Science (D4S) is a trusted platform for individuals to take control of their own data, donate, understand it, shape their own behaviour and share it for broader health and behavioural research. Donated data includes data from social media, professional sites, wearables, internet searches and watches, mobility, genetics to microbiome and beyond.	<i>Melinda Mills</i>
